

## **Consent and Authorization Form Cheat Sheet**

- ❖ A Consent and Authorization form should be signed by the patient at every clinic visit.
- ❖ Once signed, ask the patient if they would like a copy.
  - If they do, scan form into Practice Fusion and give the patient original instead of shredding it.

**Below I have listed the main points that you should emphasize before the patient signs:**

1. Medical and Undergraduate students will be involved in the process of giving you medical care.
2. All of your information will be kept confidential, however it will be used for teaching purposes with University of Florida Students.
3. Signing this, you are acknowledging that you are accepting medical care and giving EACN the permission to treat any conditions you may have as our providers see fit.

Do not forget to write the **Patient Name** and **Date** at the top and have the Patient **sign** at the bottom. You will sign on the **Witness** line. *Disregard all other lines.*
